

Let's Create an Air Revolution

Music and Words by Tim Parker on behalf of B&NES Music Service

Rap No.1

The air I breathe is full of invisibles,
dirt and smoke and harmful chemicals.

Walk or run or take the bus,
it'll clean up the air – it'll really help us.

If you drive electric or hybrid too
the low emissions will help break through
to bright clean skies for a healthy heart
Take one step, that's where we'll start.

Don't forget you'll benefit too
Take the bike or train, just do it for you.
For shorter journeys it's just as quick
to go on foot.

Tick tock tick ... then
before we know it, we'll all feel good
we can walk to school, or play in the woods.
our country roads won't look so grey.
We'll all create a better day.

Song No.1

We don't wanna cough
We don't wanna wheeze
We want air that's clean
Air for us to breath

Song No.2

Let the future show
Show the purer air
and the greener earth
Because we all care

Descant over Song No.2

Breathe in clean air x2

Rap No. 2

Parked outside the school again,
Turn off your engine, and maintain ...
the clean air goal, the challenge is clear
Let's get it right, get better air.
Stop the rot of the air we breathe
It's everybody's job, and we must save ...
the roads, they're full - they're packed to bursting
We're just sitting in cars, it's ourselves we're hurting

We know the reasons, we've read the news
Look at the streets, look at the clues.
There's loads of things that we can do
... to clean the air, YES me and you.
Turn off the lights, only fill the kettle ...
with what you need, have you got the mettle
to make cleaner streets, less pollution
Let's create an air revolution!

Song 1 & 2 (repeat with descant)

Final Rap (+ve feeling)

If we clean the air
While we're in our prime
We'll make a change
One step at a time
Be more active
Do one thing today
That'll make a difference
Make a clean airway ...
For us to walk through
On our way to school
Don't forget our parks
Are a bright green jewel
That are in our city for us to use

Enjoy being green, you've nothing to lose x2

Enjoy being green, you've nothing to lose. (repeat to fade)
