

Part 2

What should
they do?

Priya comes home to find that the new puppy has been in her bedroom and chewed up some things including a mango flavoured vape she'd hidden under her bed. She doesn't know if the liquid is dangerous to dogs. The puppy seems fine...

What should she do?

Zifa's dad has bought a few cartons of cigarettes and Zifa has taken a pack. He's smoked a few and told his friends that they make him feel much more relaxed and less stressed out. He's encouraging his friends to try the cigarettes too and tells them they will feel much more chilled.

How can they
tell Zifa they
don't want to?

Hamish is worried about his older sister as she spends all her time in their garden shed with a group of friends smoking weed. She either doesn't talk or is grumpy and has been skipping some of her college classes. She also seems to stumble about and keeps forgetting things.

What should
Hamish do?

Lulu's parents work long hours and she often picks up dinner from a local takeaway. An older guy has been speaking to her regularly, he seems nice and has given her vapes a few times. He's becoming more friendly and suggesting she might want to do a bit of work for him for some extra pocket money.

What would you say to Lulu?
